## CHAPTER 1 OPERATION MAJESTIC-12

# Section I. PROJECT PURPOSE AND GOALS

#### Scope

This manual has been prepared especially for Majestic-12 units. Its pur-MAJI pose is to present all aspects of Majestic—12 so authorized personnel will have a better understanding of the goals of the Group, be able to more expertly deal with Unidentified Flying Objects, Extraterrestrial Technology and Entities, and increase the efficiency of future operations.

#### 2. General

MJ-12 takes the subject of UFOBs, Extraterrestrial Technology, and RET-MAJIC Exertaterrestrial Biological Entities very seriously and considers the entire ompartmentali, subject to be a matter of the very highest national security. For that reason ational security everything relating to the subject has been assigned the very highest secuity classification. Three main points will be covered in this section.

a. The general aspects of MJ-12 to clear up any misconceptions that anyone may have.

The importance of the operations.

c. The need for absolute secrecy in all phases of operation.

### e by federal law . Security Classification

All information relating to MJ-12 has been classified MAJIC EYES this document ONLY and carries a security level 2 points above that of Top Secret. The eason for this has to do with the consequences that may arise not only from persons require the impact upon the public should the existence of such matters become gen-1e MJ-12 GRO eral knowledge, but also the danger of having such advanced technology as duction in any formas been recovered by the Air Force fall into the hands of unfriendly foreign owers. No information is released to the public press and the official govanscribed notes rnment position is that no special group such as MJ-12 exists.

#### . History of the Group

Operation Majestic-12 was established by special classified presidential order on 24 September 1947 at the recommendation of Secretary of Defense James V. Forrestal and Dr. Vannevar Bush, Chairman of the Joint Research and Development Board. Operations are carried out under a Top secret Research and Development - Intelligence Group directly responsible only to the President of the United States. The goals of the MJ-12 Group

ILY

are as follows:

- a. The recovery for scientific study of all materials and devices of a foreign or extraterrestrial manufacture that may become available. Such material and devices will be recovered by any and all means deemed necessary by the Group.
- b. The recovery for scientific study of all entities and remains of entities not of terrestrial origin which may become available through independent action by those entities or by misfortune or military action.
- c. The establishment and administration of Special Teams to accomplish the above operations.
- The establishment and administration of special secure facilities located at secret locations within the continental borders of the United States for the receiving, processing, analysis, and scientific study of any and all material and entities classified as being of extraterrestrial origin by the Group or the Special Teams.
- e. Establishment and administration of covert operations to be carried out in concert with Central Intelligence to effect the recovery for the United JIC EYE States of extraterrestrial technology and entities which may come down inside the territory of or fall into the possession of foreign powers.
- f. The establishment and maintenance of absolute top secrecy concerning ecurity all the above operations. SS to th

# personn. 5. Current Situation

It is considered as far as the current situation is concerned, that there are few indications that these objects and their builders pose a direct threat to sonnel the security of the United States, despite the uncertainty as to their ultiallaw. mate motives in coming here. Certainly the technology possessed by these beings far surpasses anything known to modern science, yet their presence ment for species, at least for the present. Several dead entities have been recovered require along with a substantial amount of wreckage and devices from downed craft, GROU all of which are now under study at various locations. No attempt has been made by extraterrestrial entities either to contact authorities or to recover any for their dead counterparts or the downed craft, even though one of the crashes notes was the result of direct military action. The greatest threat at this time arises from the acquisition and study of such advanced technology by foreign powers unfriendly to the United States. It is for this reason that the recovery and study of this type of material by the United States has been given such a high priority.

# CHAPTER 2 INTRODUCTION

#### Section I. GENERAL

#### Scope

a. This operations manual is published for the information and guidance of all concerned. It contains information on determination, documentation, collection, and disposition of debris, devices, craft, and occupants of such craft as defined as Extraterrestrial Technology or Extraterrestrial Biological Entities (EBEs) in Section II of this chapter.

b Appendix I-ia contain a list of current references, including technical manuals and other available publications applicable to these operations.

Appendix II contains a list of personnel who comprise the Majestic-12 Group

#### 7. Forms and Records

Forms used for reporting operations are listed in Appendix I.

#### Section II. DEFINITION AND DATA

ADV I

Extraterrestrial Technology is defined as follows:

a. Aircraft identified as not manufactured in the United States or any terrestrict foreign power, including experimental military or civilian aircraft. Aircraft in this category are generally known as Unidentified Flying Objects UFORs U Such aircraft may appear as one of several shapes and oxidigastrong and exhibit extraordinary flight characteristics.

b. Objects and devices of anknown origin or function, manufactured by processor or of maternals not consistent with current technology or attention provincion.

Wreckage of any ameralt thought to be of extraterrectrial manufacture or or the wreckage may be the result of accidents or military action.

d. Materials that exhibit unusual or extraordinary characteristics ask consistent with current technology or scientific knowledge.

Extraterrestrial Buildginel Entities (EREs) are described as:

Creatures, homomored or otherwise, whose evolutionary processes proposed to for their development is demonstrably different from those protolated or observed to home superus.

347-12 46366

# TOP SECRET / MAJIC EYES ONLY

REPRODUCTION IN ANY FORM IS PORESISTEN AT PROBLEM LAW

#### 9. Description of Craft

Documented extraterrestrial craft ( UFOBs ) are classified in one of four categories based on general shape, as follows:

a. Elliptical, or disc shape. This type of craft is of a metallic construction and dull aluminum in color. They have the appearance of two pie-pans or shallow dishes pressed together and may have a raised dome on the top or bottom. No seams or joints are visible on the surface, giving the impression of one-piece construction. Discs are estimated from 50-300 feet in diameter and the thickness is approximately 15 per cent of the diameter, not including the dome, which is 30 per cent of the disc diameter and extends another 4-6 feet above the main body of the disc. The dome may or may not include windows or ports, and ports are present around the lower rim of the disc in some instances. Most disc-shaped craft are equipped with lights on the top and bottom, and also around the rim. These lights are not visible when the craft is at rest or not functioning. There are generally no visible antenna or projections. Landing gear consists of three extendible legs ending in circular anding pads. When fully extended this landing gear supports the main CRET-MAJIC EY body 2-3 feet above the surface at the lowest point. A rectangular hatch is ocated along the equator or on the lower surface of the disc.

b. Fuselage or cigar shape. Documented reports of this type of craft are national security extremely rare. Air Force radar reports indicate they are approximately 2 NLY ACCESS to thousand feet long and 95 feet thick, and apparently they do not operate in he lower atmosphere. Very little information is available on the perfornance of these craft, but radar reports have indicated speeds in excess of ,000 miles per hour. They do not appear to engage in the violent and

personnel erratic maneuvers associated with the smaller types.

c. Ovoid or circular shape. This type of craft is described as being shaped ke an ice cream cone, being rounded at the large end and tapering to a ear-point at the other end. They are approximately 30-40 feet long and the ment whick end diameter is approximately 20 per cent of the length. There is an xtremely bright light at the pointed end, and this craft usually travels oint down. They can appear to be any shape from round to cylindrical, GROU epending upon the angle of observation. Often sightings of this type of raft are elliptical craft seen at an inclined angle or edge-on.

d. Airfoil or triangular shape. This craft is believed to be new technology ue to the rarity and recency of the observations. Radar indicates an isoscees triangle profile, the longest side being nearly 300 feet in length. Little is snown about the performance of these craft due to the rarity of good sightngs, but they are believed capable of high speeds and abrupt maneuvers imilar to or exceeding the performance attributed to types "a" and "c".

#### 10. Description of Extraterrestrial Biological Entities (EBEs)

Examination of remains recovered from wre-kage of UFOBs indicates that Extraterrestrial Biological Entities may be classified into two distinct categories as follows:

a. EBE Type I. These entities are humanoid and might be mistaken for human beings of the Oriental race if seen from a distance. They are bipedal, 5-5 feet 4 inches in height and weigh 80-100 pounds. Proportionally they are similar to humans, although the cranium is somewhat larger and more rounded. The skin is a pale, chalky-yellow in color, thick, and slightly pebbled in appearance. The eyes are small, wide-set, almond-shaped, with brownish-black irises with very large pupils. The whites of the eyes are not like that of humans, but have a pale gray cast. The ears are small and set ow on the skull. The nose is thin and long, and the mouth is wider than in humans, and nearly lipless. There is no apparent facial hair and very little body hair, that being very fine and confined to the underarm and the groin area. The body is thin and without apparent body fat, but the muscles are well-developed. The hands are small, with four long digits but no opposable RET-MAJIC Ex thumb. The outside digit is jointed in a manner as to be nearly opposable, and there is no webbing between the fingers as in humans. The legs are compartmentaliz slightly but noticeably bowed, and the feet are somewhat splayed and pro-national security portionally large.

b. EBE Type II. These entities are humanoid but differ from Type I in many respects. They are bi-pedal, 3 feet 5 inches - 4 feet 2 inches in height mited to persont and weigh 25-50 pounds. Proportionally, the head is much larger than RANCE LEVE humans or Type I EBEs, the cranium being much larger and elongated. The ized personnel eyes are very large, slanted, and nearly wrap around the side of the skull. by federal law, and the skull has a slight peak that runs over the crown. The nose consists of two small slits which sit high above the slit-like mouth. There are no ment ton the back of the creature and is transfer to being somewhat darker equir hair on either the face or the body, and these creatures do not appear to be GROT mammalian. The arms are long in proportion to the legs, and the hands have three long, tapering fingers and a thumb which is nearly as long as the by for ingers. The second finger is thicker than the others, but not as long as the tes index finger. The feet are small and narrow, and four toes are joined ogether with a membrane.

It is not definitely known where either type of creature originates, but it seems certain that they did not evolve on earth. It is further evident, although not certain, that they may have originated on two different plan-

## 11. Description of Extraterrestrial Technology

The following information is from preliminary analysis reports of wreckage collected from crash sites of extraterrestrial craft 1947-1953, excerpts from which are quoted verbatim to provide guidance as to the type and characteristics of material that might be encountered in future recovery operations

Initial analysis of the debris from the crash site seems to indicate that the debris is that of an extraterrestrial craft which exploded from within and came into contact with the ground with great force, completely destroying the craft. The volume of matter indicates that the craft was approximately the size of a medium aircraft, although the weight of the debris indicates that the craft was extremely light for its size.

b. Metallurgical analysis of the bulk of the debris recovered indicates that the samples are not composed of any materials currently known to Terrestrial science.

The material tested possesses great strength and resistance to heat in proportion to its weight and size, being stronger by far than any materials used in military or civilian aircraft at present.

d. Much of the material, having the appearance of aluminum foil or aluminum-magnesium sheeting, displays none of the characteristics of either metal, resembling instead some kind of unknown plastic-like material.

Solid structures and substantial beams having a distinct similarity in appearance to very dense grain-free wood, was very light in weight and poscesses tensile and compression strength not obtainable by any means known to modern industry.

 None of the material tested displayed measurable magnetic characterisics or residual radiation.

g Several samples were engraved or embossed with marks and patterns. These patterns were not readily identifiable and attempts to decipher their meaning has been largely unsuccessful.

h Examination of several apparent mechanical devices, gears, etc. evealed little or nothing of their functions or methods of manufacture.

## CHAPTER 3 RECOVERY OPERATIONS

#### Section I. SECURITY

# T / MAJIC

ONLY

limited to person

notes

#### 12. Press Blackout

Great care must be taken to preserve the security of any location where Extraterrestrial Technology might be retrievable for scientific study. Extreme measures must be taken to protect and preserve any material or craft from discovery, examination, or removal by civilian agencies or individuals of the general public. It is therefore recommended that a total press blackout be initiated whenever possible. If this course of action should not prove feasible, the following cover stories are suggested for release to the The officer in charge will act quickly to select the cover story that press. SECRET-MAJIC Ex best fits the situation. It should be remembered when selecting a cover ig compartmentalizatory that official policy regarding UFOBs is that they do not exist.

a. Official Denial. The most desirable response would be that nothing e national security inusual has occurred. By stating that the government has no knowledge of ONLY ACCESS to the event, further investigation by the public press may be forestalled.

b. Discredit Witnesses. If at all possible, witnesses will be held incommunicado until the extent of their knowledge and involvement can be deter-LEARANCE LEVE mined. Witnesses will be discouraged from talking about what they have thorized personnel seen, and intimidation may be necessary to ensure their cooperation. If witnesses have already contacted the press, it will be necessary to discredit Sederal law. Their stories. This can best be done by the assertion that they have either misinterpreted natural events, are the victims of hysteria or hallucinations, or are the perpetrators of hoaxes.

c. Deceptive Statements. It may become necessary to issue false statements to preserve the security of the site. Meteors, downed satellites, GROI weather balloons, and military aircraft are all acceptable alternatives, any for although in the case of the downed military aircraft statement care should be exercised not to suggest that the aircraft might be experimental or secret, as this might arouse more curiosity of both the American and the foreign press. Statements issued concerning contamination of the area due to toxic pills from trucks or railroad tankers can also serve to keep unauthorized or indesirable personnel away from the area.

#### 3. Secure the Area

The area must be secured as rapidly as possible to keep unauthorized personnel from infiltrating the site. The officer in charge will set up a perimeter and establish a command post inside the perimeter. Personnel allowed

MJ-12 4838B

TOP SECRET / MAJIC EYES ONLY REPRODUCTION IN ANY FORM IS FORBIDDEN BY FEDERAL LAW

a Perimeter. It is desirable that sufficient military personnel be utilized o set up a perimeter around the site large enough to keep both unautho. gred personnel and the perimeter personnel from seeing the site. Once the ate is contained, regular patrols will be set up along the perimeter to sesure graphete security, and electronic surveillance will be utilized to augment the strols. Perimeter personnel will be equipped with hand communication nd automatic weapons with live amminition. Personnel working at the to will carry sidearms. No unauthorized personnel will be allowed into the

b. Command Post. Ideally, the command post should be as close to the ite as is practical to efficiently coordinate operations. As soon as the comhand post is operational, contact with the Majestic-12 Group will be estabshed via secure communications.

r. Area Sweep. The site and the surrounding area will be cleared of all e national security manthorized personnet. Witnesses will be debriefed and detained for fur-ONLY ACCESS to ber examination by MJ-12. Under no circumstances will witnesses be bleased from custody until their stories have been evaluated by MJ-12 and limited to person hey have been thoroughly debriefed.

LEARANCE LEVEL Situation Evaluation. A preliminary evaluation of the situation will be uthorized personne supleted and a preliminary report prepared. The Md-12 Group will then e briefed on the situation at the earliest possible opportunity. The MJ-12 table by federal late troup will then make a determination as to whether or not a MJ-12 RED EAM or OPNAC Team will be dispatched to the area.

#### Section II. TECHNOLOGY RECOVERY

production in any ( As soon as communication is established, removal and transport of all transcribed noter pateriel will commence under orders from MJ-12.

a Documentation. If the situation permits, care should be taken to docuhent the area with photographs before anything is moved. The area will be hecked for radiation and other toxic agents. If the area cannot be kept ecure for an extended period of time, all material must be packed and ransported as quickly as possible to the nearest secure military facility. his will be accomplished by covered transport using little-traveled roads vherever possible.

 Complete or Functional Craft. Craft are to be approached with extreme aution if they appear functional, as serious injury may result from exposure
